Background to the Programme

The UK India Education Research Initiative (UKIERI) started in April 2006 with the aim of enhancing educational links between India and the UK.

The following values and principles have been embedded into the design and implementation of the initiative across the various programmes being implemented:

- Mutual benefit
- Sustainability
- Capacity building
- Social inclusion

Phases of UKIERI

The aim of Phase 1 (2006-2011) of the programme was to establish UKIERI as a framework to enable a step-change in the UK-India relationship in education and research.

Phase 2 (2011-2016) focused on thematic areas agreed by both countries which included Leadership Development, Innovation Partnerships, Skills Development and Enhancing Mobility.

UKIERI Phase 3 (2016-2021) aims to build on the achievements of the previous two phases through a targeted approach focussed upon maximising impact. Fewer, long term activities will be undertaken to enhance the quality of education and research links across the two countries and these will be driven by and for practitioners.

UKIERI Phase 3 has three strands of activity:

Strand 1: Leadership and faculty development

Strand 2: Integration of skills in education

Strand 3: E-partnership and research incubation

This call is a key activity of Strand 3: E-partnership & research incubation.

UKIERI is funded from India by the Ministry of Human Resource Development, Department for Science and Technology, the Ministry of Skill Development and Entrepreneurship, the University Grants Commission and All India Council for Technical Education. It is funded from the UK by the Department for Business, Energy and Industrial Strategy, Foreign and Commonwealth Office, British Council, Scottish Government, Welsh Government and Department for the Economy in Northern Ireland.
